

I-95 Express Toll LanesSM

Cowenton Avenue and Joppa Road Bridge Replacements

The Maryland Transportation Authority recently replaced the bridges that carry Cowenton Avenue and Joppa Road over I-95. The new bridges are longer and allow for the addition of Express Toll Lanes (ETLsSM) along mainline I-95. They were built wider to accommodate pedestrians and bicyclists, as well as to improve safety. The new Joppa Road Bridge was constructed in the same location as the original bridge. The new Cowenton Avenue Bridge was built just north of the existing bridge.

About Construction

Construction of the two bridges began in spring 2006. Both replacement bridges are now open to traffic.

Cowenton Avenue Bridge Highlights

The new Cowenton Avenue Bridge features:

- Two lanes, which is the same configuration as the previous bridge;
- Five-foot sidewalks and wider shoulders for bike paths; and
- A length of 302 feet, which is 78 feet longer than the original bridge.

Joppa Road Bridge Highlights

The new Joppa Road Bridge was opened 3 months ahead of schedule. This bridge received the *Mid-Atlantic Construction Magazine's* "Best of 2007" Bridge Award of Merit. The bridge features:

- Two lanes, which is the same configuration as the previous bridge;
- Five-foot sidewalks and wider shoulders for bike paths; and
- A length of 298 feet, which is 56 feet longer than the previous bridge.
